## FY2016 Water Service Fees

### **Billing Fee's (Base plus Consumption)**

Everyone receives a base charge; the amount depends on the size of your water meter and how you are billed (quarterly, monthly). Water consumption is based on the three steps (consumption is multiplied by rate) is then added to the bill for a total amount due. The City of Taunton bills customers per hundred cubic feet (hcf). One (1) hcf equals 748 gallons of water.
